

# Senior Outreach Services

Since 1977, we've been empowering older adults to continue to live as independently as possible with support from experienced, caring, licensed Social Workers. On average, more than 98% of clients remain independent.

## Identify Needs

We listen carefully to the client to identify strengths and assess areas of daily life where support might be helpful.

## Connect to Resources

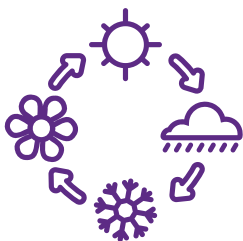

Using the assessment, we suggest trusted, affordable resources to address unique needs, which may include:

- Home maintenance
- Health care
- Chore services
- Finances
- Personal care
- Transportation
- Caregiver support
- Insurance or legal services

## Assist with Program Applications

For requested services, including local and government programs, we can help with applications.

## Navigate Life Changes

Clients can continue to contact us for help as life changes occur. These changes might be a loss of income, widowhood, diagnosis of a new or chronic disease, or a desire to prepare for the future.
